

Instructions for Block Paper Model Adventure Pack

Follow these simple instructions to make your block character scene!

You will need:

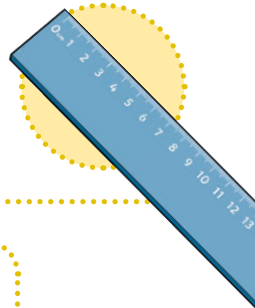

a pair of scissors

some glue

a ruler

Instructions:

1. First, cut out the three templates.

The block pig template is the trickiest to cut. Take your time to make sure you have cut out all the solid black lines that go around the outside of the template. Do not cut any solid black lines that make up the design of the block pig.

2. Now time to fold all of the dotted and dashed lines to help you make the shapes before gluing.

All of the dotted lines fold down (a hill fold). All of the 'dotted and dashed' lines fold up (a valley fold). If you can't fold the paper easily, check to see if there is a solid black cutting line that you missed.

Follow this diagram:

- 1) Cut _____
- 2) Valley Fold - - - - -
- 3) Hill Fold
- 4) Glue 1 2 3

How to make the Block Adventurer Paper Model:

3. First, make the block adventurer's body. You need to glue tabs 1 and 2 to the sides next to them to make a square-shaped hollow base. Your block adventurer should now stand up.

4. Now, glue tab 3 to the back part of the block adventurer's head.

5. **WARNING: This bit is fiddly!**

Add glue to tab 4, fold down the top of the head and push tab 4 inside. Take a pencil or pen and put it into the hollow body section to hold tab 4 in the correct place until the glue has dried.

6. Then add glue to shapes 5 and 6 and fold down the left and right sides of the head.

7. Finally, add glue to the reverse sides of the arms and, for each arm, stick the two sides together.

8. Your block adventurer paper model is complete! Now he needs a work bench!

How to make the Workbench Paper Model

9. Glue tab 1 to the other side to make the square-shaped hollow base of the workbench.

10. To finish the top part of the work bench, add glue to tab 2 and tuck it inside.

11. Turn the workbench over and glue tabs 3 and 4 in turn to the inside of the workbench and hold the tabs until the glue has dried.

8. Your block adventurer paper model is complete! Now he needs a work bench!

How to make the Block Pig Paper Model

12. With the template folded, it should be easy to see the shape of the finished block pig. This is the version without the armour but another template is available with armour on!

13. First, make the back of the pig. Glue tab 1 to the left side of the body.

14. Now fold the top of the pig's head down and glue tab 2 to the other side of it.

15. Glue tab 3 inside the side of the head, under shape 6.

16. At the back of the pig's body, glue tab 4 to the tail section.

17. Then, glue tab 5 inside the back leg section.

18. At the side of the pig's head, fold down the head and ear section and glue it to shape 6. The ear should fold outwards.

19. Repeat Step 18 with the other side of the head and shape 7.

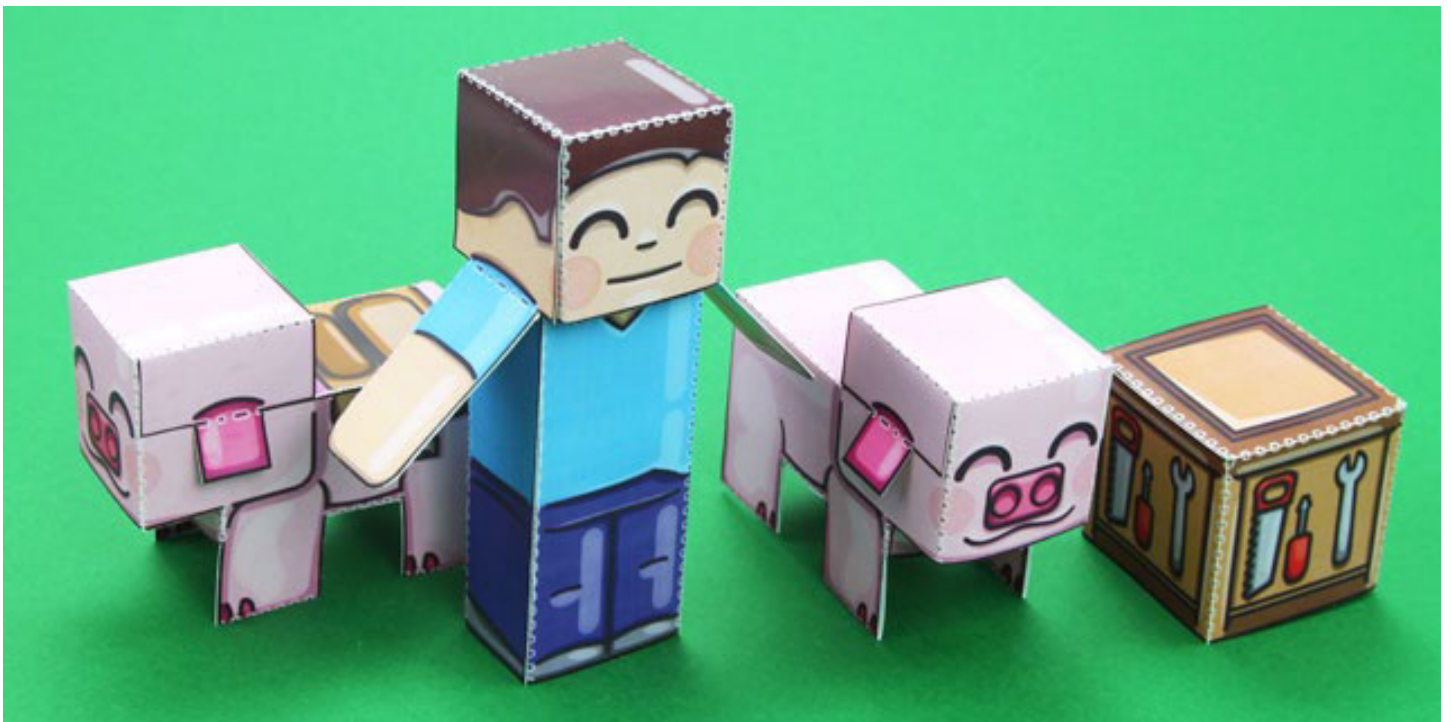

20. Above the pig's front legs, join the two narrow shapes together with glue on shape 8.

21. Then, join the pig's middle sections together with glue on shape 9.

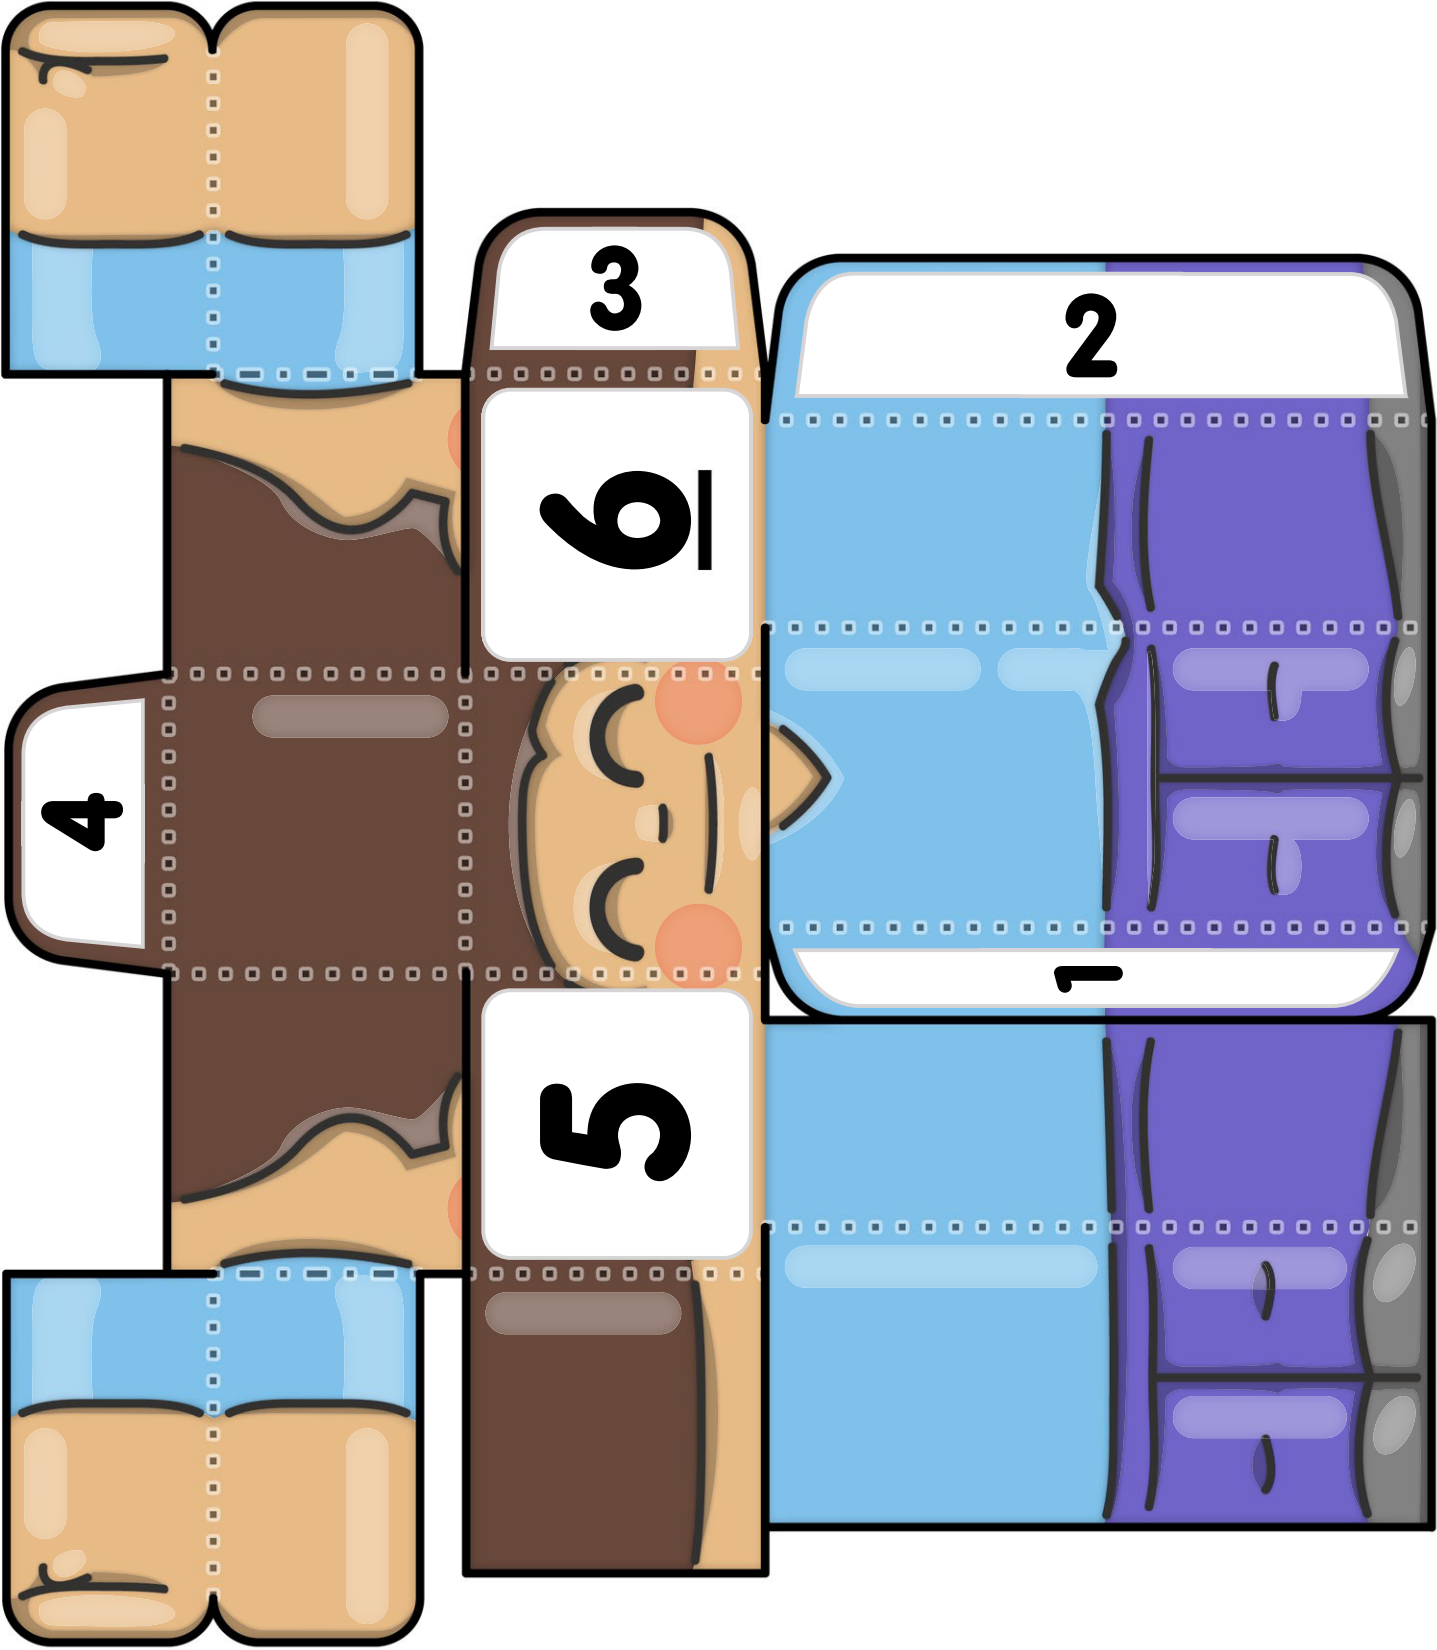

22. Finally, glue and hold the sides of each leg together.

You have finished making your set of three models for your Block Paper Model Adventure Pack!
